

# I Love Math – Lesson 06: Adding Fractions (Same Denominator)

Website: <https://ilovemath.live>

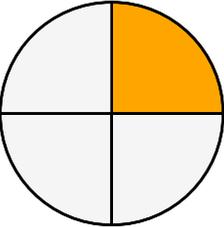

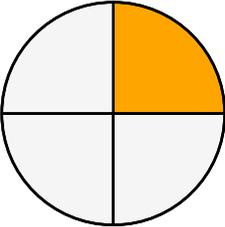

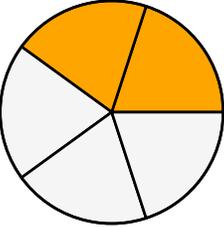

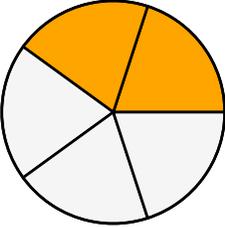

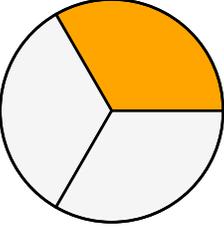

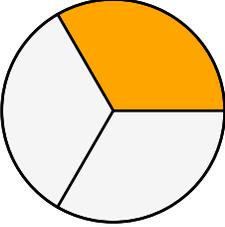

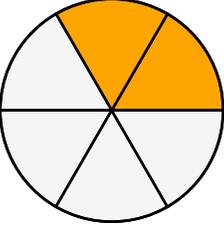

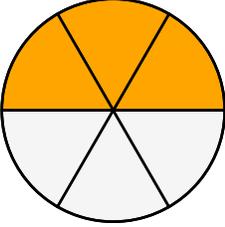

## Discussion

When adding fractions with the same denominator, we add only the numerators. The denominator stays the same because the whole is still divided into the same number of parts.

## Examples (Answers shown for learning)

## Quiz – Add the Fractions

		Result: _____
		Result: _____
		Result: _____
		Result: _____

## Answer Key (Quiz)

1)  $\frac{1}{4} + \frac{1}{4} = \frac{2}{4}$

2)  $\frac{2}{5} + \frac{2}{5} = \frac{4}{5}$

3)  $\frac{1}{3} + \frac{1}{3} = \frac{2}{3}$

4)  $\frac{2}{6} + \frac{3}{6} = \frac{5}{6}$
