

# I Love Math – Lesson 07: Subtracting Fractions (Same Denominator)

Website: <https://ilovemath.live>

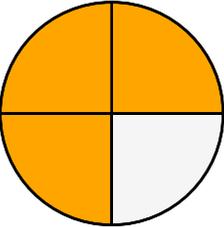

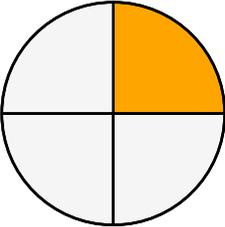

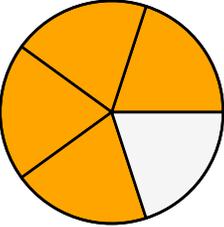

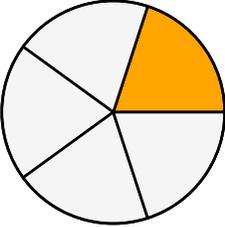

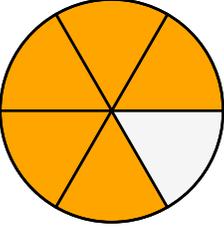

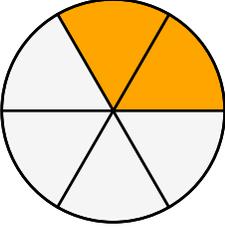

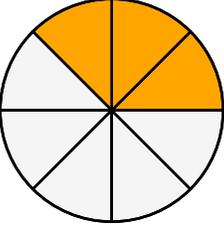

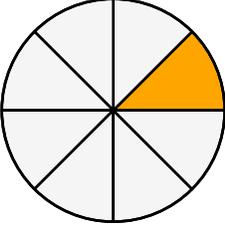

## Discussion

When subtracting fractions with the same denominator, subtract the numerators and keep the denominator the same. The denominator stays the same because the whole is still divided into the same number of equal parts.

## Examples (Answers shown for learning)

## Quiz – Subtract the Fractions

		<p>Result: _____</p>
		<p>Result: _____</p>
		<p>Result: _____</p>
		<p>Result: _____</p>

## Answer Key (Quiz)

1)  $\frac{3}{4} - \frac{1}{4} = \frac{2}{4}$

2)  $\frac{4}{5} - \frac{1}{5} = \frac{3}{5}$

3)  $\frac{5}{6} - \frac{2}{6} = \frac{3}{6}$

4)  $\frac{3}{8} - \frac{1}{8} = \frac{2}{8}$
